### DISCUSSION

According to the Japanese Office Action issued on 11 October 2005, corresponding the Japanese Patent Application No. 2004-071695, **Hamada, JP'314** discusses that the private branch exchange 100 in the private branch radio exchange system connects a PHS terminal 102 capable of executing an independent communication in the private branch and public communication outside the branch and a local radio base station 101 to be connected by the independent communication to an extension and stores the line of a public network 10 in a line wire. Since a position registration management block 226 for managing the position registration state of the terminal 102 and a transferred destination number management block 227 for storing the telephone number of transferred line wire are included in the exchange 100, the exchange 100 retrieves its own block 226 when incoming to a radio communication terminal is generated, and when its corresponding position is registered, connects the incoming through the base station 101 connected to the extension. When there is no registration, the exchange 100 retrieves its own block 227 and transfers the incoming to the telephone number of the corresponding transferred line wire, so that the accuracy of connection of incoming can be improved.

**Mitsuo, JP'812** relates that a wired port physical number is registered in relation to a radio port physical number and wired telephone sets 006a, 006b,... and radio telephone sets 008a, 008b,... which are different extensions usually are dealt with as if they were master-slave telephone sets. Thus, when two sets of the radio and wired telephone sets are used by one person, a transfer of a call from a wired telephone set to a radio telephone set is attained and when the wired telephone sets 006a, 006b,... are located on desk and the radio telephone sets 008a, 008b,..., are carried, the radio telephone sets 008a, 008b,... are carried up to a remote location. Furthermore, two telephone sets are used as if they were in parallel connection and a call between an external line and the radio telephone sets 008a, 008b,... is transferred to the wired telephone sets 006a, 006b,....

The citation of the foregoing references is not intended to constitute an assertion that other or more relevant art does not exist. Accordingly, the Examiner is requested to make a wide-ranging and thorough search of the relevant art.

Pursuant to 37 C.F.R. §1.97(c)(2), the fee set forth under 37 C.F.R. §1.17(p) of \$180.00 accompanies this Information Disclosure Statement. Should the check become lost, be deficient in payment, or should other fees be incurred, the Commissioner is authorized to charge Deposit Account No. 02-4943 of Applicant's undersigned attorney in the amount of such fees.

Respectfully submitted,
